Regional Health Eco-systems

Including VET in an already existing health eco-system model.....

Including continuing and Lifelong VET

Objectives of the regional VET hubs:

- Create collaboration and coordination between health care providers and the health care education providers
- Think out of the box and create new ways of learning
- Breaking down the silos through e.g. internships, apprenticeships and common innovation activities
- Create more "real world" learning opportunities
- Create more mobility (horizontal and upward convergence)
